Development Process

November 2012

The Village of Carpentersville takes pride in being a business-friendly community. The Village has set up a process to guide projects through the system as quickly and efficiently as possible.

Project Manager

A Project Manager will be assigned to your case. Prior to submittal of a formal application, your Project Manager will be the Assistant Village Manager, Joe Wade. After submittal of a formal application, your Project Manager will be the Senior Planner, John Svalenka. The Project Manager will be your main contact and will guide you through the approval process from the initial meeting until the project is complete.

Development Team

The Village offers a one-stop development review. The Development Team, which includes representatives from Economic Development, Planning & Zoning, Engineering, the Fire Department, the Village Clerk's office and Public Works, meets on a regular basis to review and discuss projects. The Development Team is available to meet with applicants every week.

Simultaneous Site Reviews

Site development plans will be reviewed by all members of the Development Team at the same time so that the applicant receives one unified plan review comment letter without any contradictions or inconsistencies.

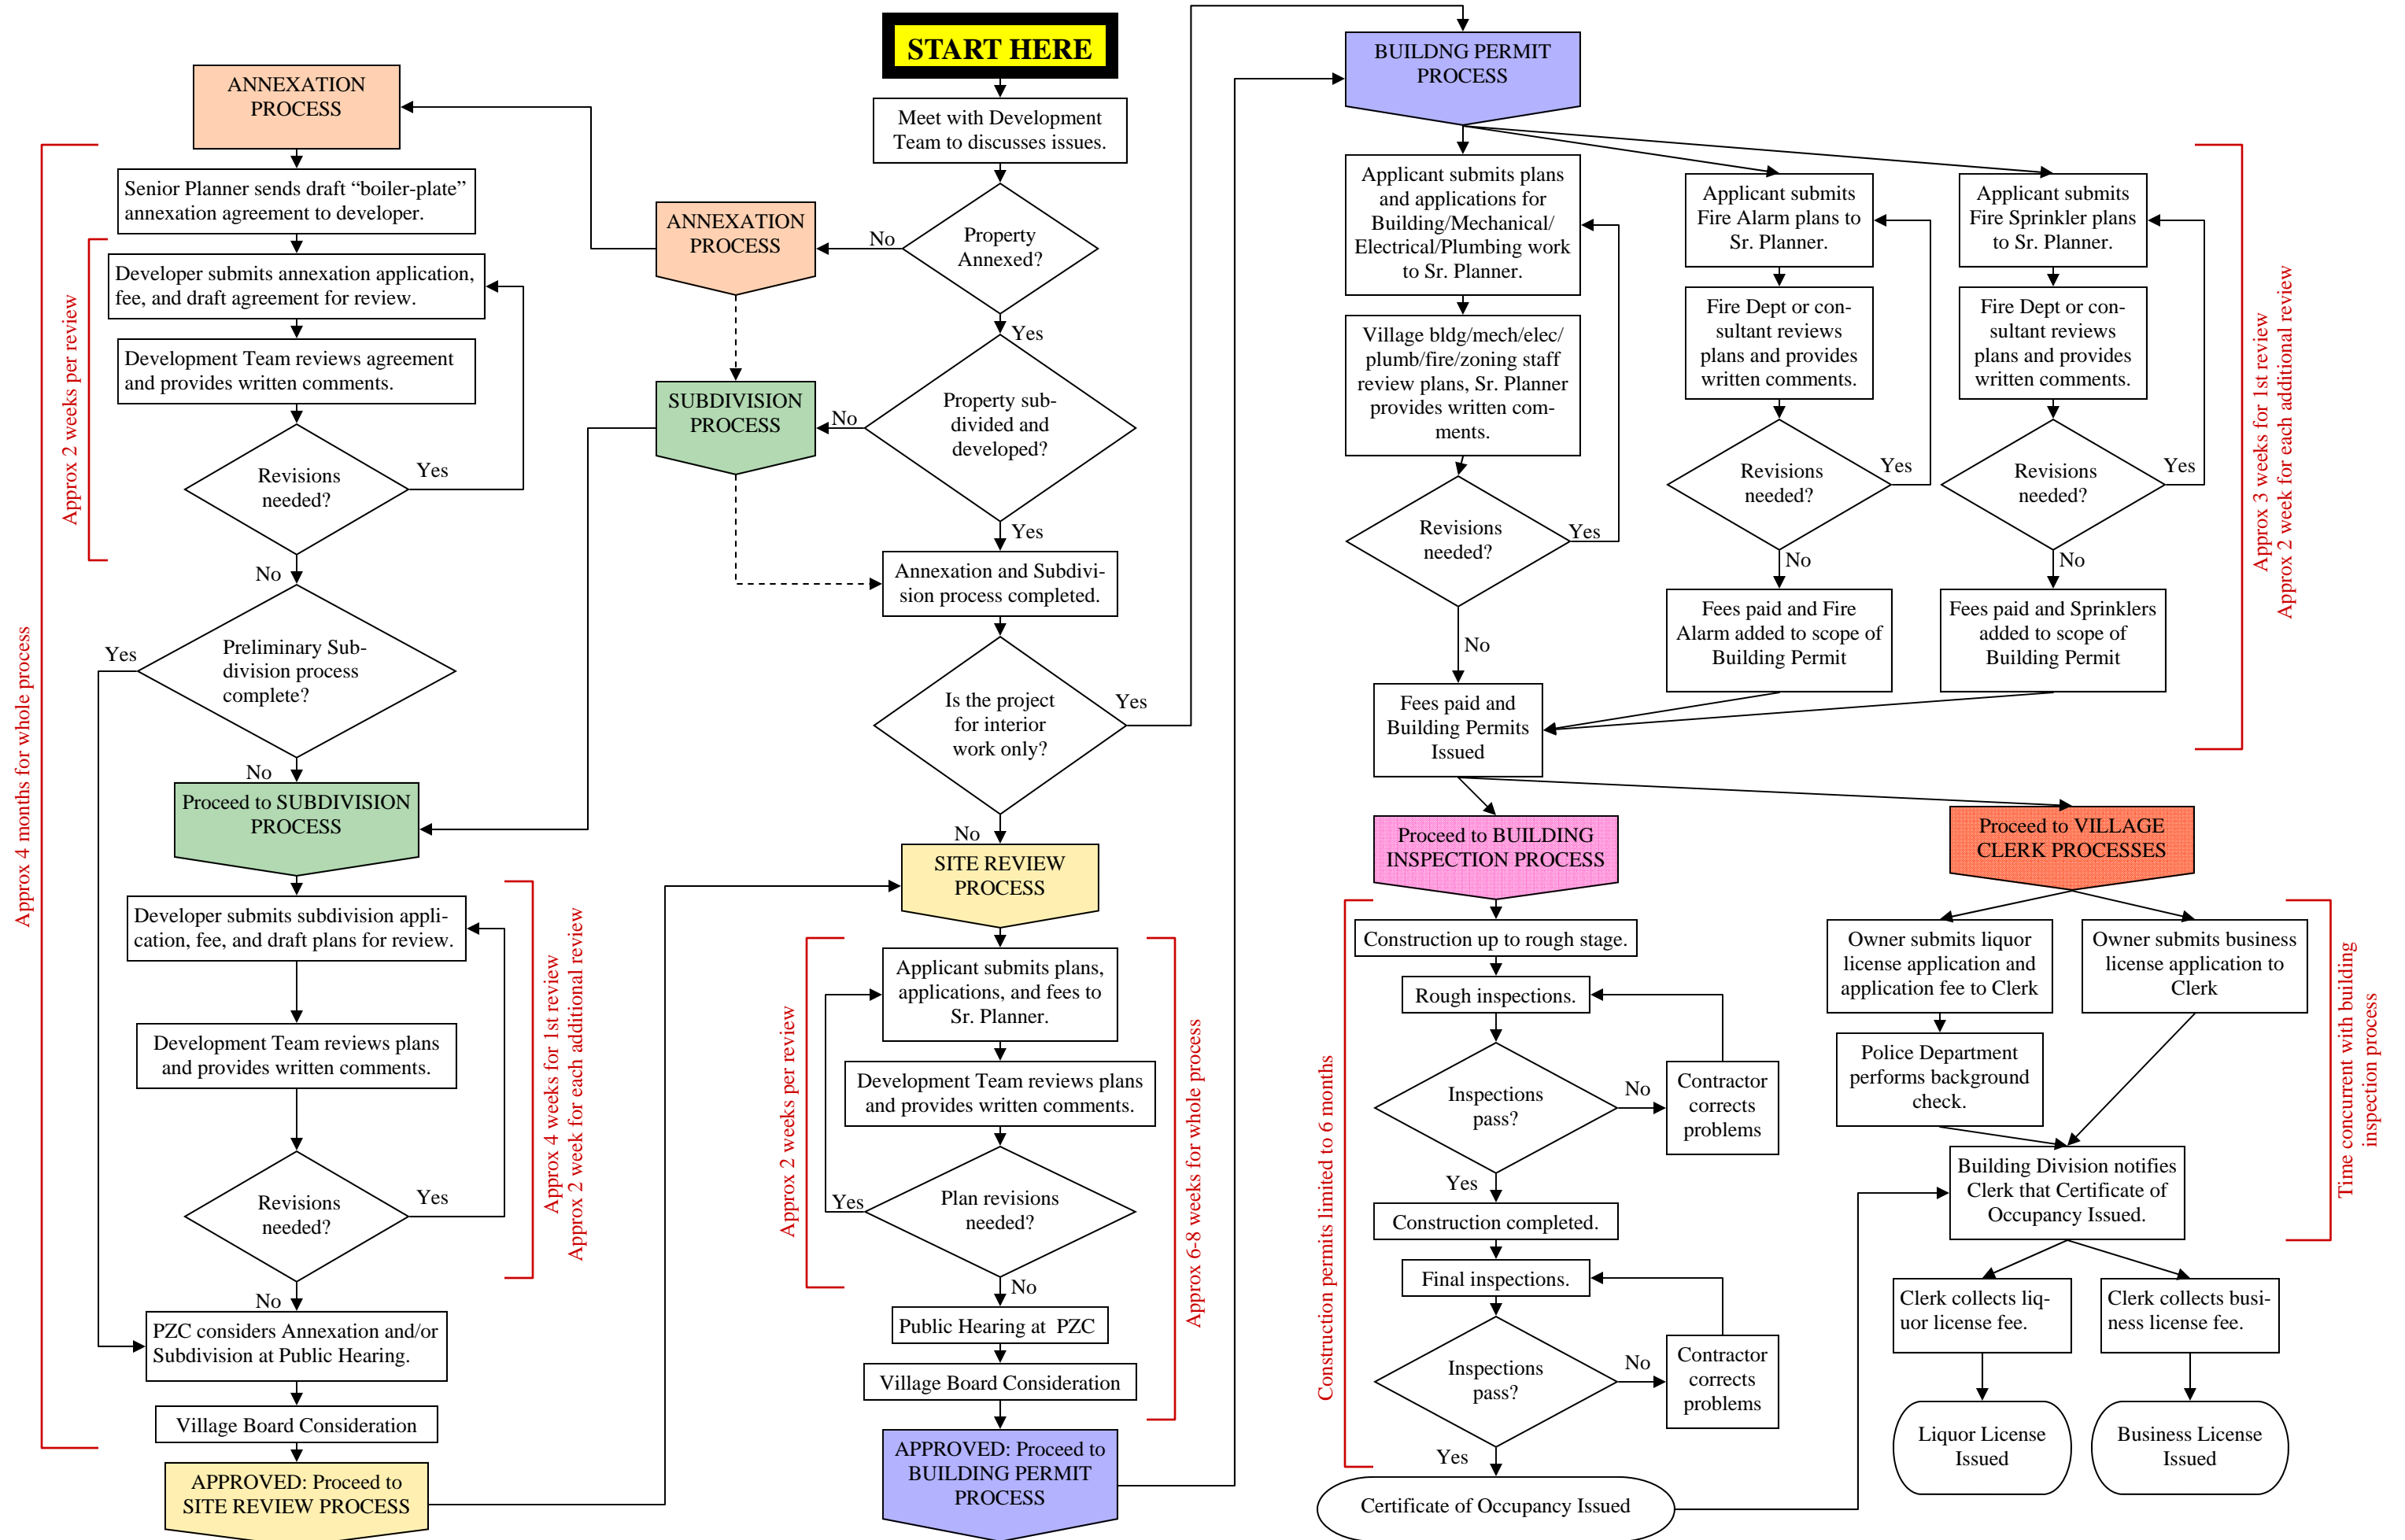

Building Permit Process

The Building Division recommends applying for all permits at once and naming a contact person to coordinate with the Village. The Village, however, will work with a developer on separate permits for shell construction and build-outs if necessary to meet contractual obligations.

Application Materials

Please reference the following forms when preparing to submit applications:

- Annexation Application
- Concept Plan Application
- Preliminary Plan Approval Application
- Final Plat Approval Application
- Planned Unit Development Application
- Rezoning/Map Amendment Application
- Special Use Permit Application
- Application for Registration of Business
- Application for Retail Liquor License
- Application for Building Permit
- Application for Mechanical Work
- Application for Electrical Work
- Application for Plumbing and Sewer Work
- Variance Application

These pages provide a summary of the development process. Please contact the Village Project Manager for more detail. These pages provide approximate timelines that are based on prompt resubmittal of plans by applicants when revisions are needed.
